note: This version of Fonelist started 140101 as a copy of a backup dated 121105 stored on Mumsy, after the live file 131230 got corrupted (simply by using !Edit to change one letter of a misspelling in the raw Impdoc — so don't do that again). Will eventually try to bring in updates made in that year, working from raw text of 131230 file. Done A–F so far; problem apparently lies at “Bobbett” in the 131230 file. (Yellow highlights by Bart mark entries copied to Organizer?)
